- 5 What is claimed is:
 - 1. A method of confering an immune response to a tumor cell in a mammal, comprising administering to said mammal an antibody which binds to aspartyl (asparaginyl) beta hydroxylase (HAAH).
- 10 2. The method of claim 1, wherein said tumor cell is a brain tumor cell.
 - 3. The method of claim 2, wherein said brain tumor cell is selected from the group consisting of a glioma, a glioblastoma, an astrocytoma, and a hemangioma.
- 15 4. The method of claim 1, wherein said tumor cell is a pancreatic carcinoma cell.
 - 5. The method of claim 1, wherein said antibody binds to an extracellular domain of HAAH.
- 20 6. The method of claim 1, wherein said antibody binds to a catalytic domain of HAAH.
 - 7. The method of claim 6, wherein said catalytic domain comprises amino acids 660-700 of SEO ID NO:2.
 - 8. The method of claim 1, wherein said antibody is FB50 or a fragment thereof.
 - 9. The method of claim 1, wherein said antibody is selected from the group consisting of FB50, 86A, 5C7 and 19B.
 - 10. The method of claim 1, wherein said antibody is a mixture of one or more antibodies selected from the group consisting of RB50, 86A, 5C7 and 19B.
- 11. The method of claim 1, wherein said antibody is a high affinity single chain antibody.

25

- 12. A method of inhibiting tumor growth in a mammal, comprising administering to said mammal an HAAH-binding antibody conjugated to a cytotoxic agent.
- 13. A method of inducing an HAAH-specific immune response in a mammal, comprising administering to said mammal an HAAH polypeptide.
 - 14. The method of claim 13, wherein said polypeptide comprises the amino acid sequence of SEQ ID NO:2.
- 15 15. The method of claim 13, wherein said polypeptide comprises an extracellular domain of HAAH and lacks an intracellular domain of HAAH.
 - 16. The method of claim 13, wherein said polypeptide comprises a catalytic domain of HAAH.
 - 17. The method of claim 16, wherein said polypeptide comprises amino acids 650-700 of SEQ ID NO:2.
 - 18. The method of claim 13, further comprising administering an adjuvant composition.
 - 19. A method of inducing an HAAH-specific immune response in a mammal, comprising administering to said mammal a polynucleotide composition encoding an HAAH polypeptide, or a degenerate variant of said polynucleotide.
 - 20. The method of claim 19, wherein said composition comprises a transfection-enhancing agent.
- 21. The method of claim 19, wherein said polypeptide comprises the amino acid sequence of SEQ ID NO:2.

- 22. The method of claim 19, wherein said polypeptide comprises an extracellular domain of HAAH and lacks an intracellular domain of HAAH.
- 23. The method of claim 19, wherein said polypeptide comprises a catalytic domain of HAAH.
 - 24. The method of claim 23, wherein said polypeptide comprises amino acids 650-700 of SEQ ID NO:2.
- of said mammal with a detectably-labeled antibody which binds to HAAH, wherein an increase in the level of antibody binding at a tissue site compared to the level of binding to a normal nonneoplastic tissue indicates the presence of a neoplasm at said tissue site.
 - 26. The method of claim 25, wherein said antibody is labeled with a radioactive compound.
 - 27. The method of claim 26, wherein said radioactive compound is selected from the group consisting of ¹²⁵I, ⁹⁹Tc.
 - 28. The method of claim 25, wherein said antibody is labeled with Gd⁺⁺⁺ or Fe⁺⁺.
 - 29. The method of claim 25, wherein said antibody is labeled with a colorimetric agent.
 - 30. The method of claim 25, wherein said tissue is a lymphoid tissue.
 - 31. A fragment of HAAH comprising an extracellular domain and lacking a cytoplasmic domain of said HAAH.

- 5 32. A fragment of HAAH, wherein said fragment lacks residues 660-758 of SEQ ID NO:2.
 - 33. A fragment of HAAH, wherein said fragment lacks residues 679-697 of SEQ ID NO:2.
 - A fragment of HAAH, wherein said fragment lacks at least one residue of SEQ ID NO:2, wherein said residue is selected from the group consisting of residue 661, 662, 663, 670, 671, 672, and 673.
 - 35. An antibody or fragment thereof, which binds to HAAH, wherein said antibody is selected from the group consisting of FB50, 86A, 5C7 and 19B.
 - 36. An antibody or HAAH-binding fragment thereof, wherein said antibody binds to a polypeptide comprising the amino acid sequence of NPVEDS (residues 286-291 of SEQ ID NO:2).
 - 37. An antibody or HAAH-binding fragment thereof, wherein said antibody binds to a polypeptide comprising the amino acid sequence of QPWWTPK (residues 573-579 of SEQ ID NO:2).
 - 38. An antibody or HAAH-binding fragment thereof, wherein said antibody binds to a polypeptide comprising the amino acid sequence of LPEDENLR (residues 613-620 of SEQ ID NO:2).
- 30 39. A kit for detecting a tumor cell, comprising an antibody, or fragment thereof, which binds to HAAH.
 - 40. The kit of claim 39, further comprising a means for detecting binding of said antibody to said tumor cell.

10

20

- 5 41. The kit of claim 40, wherein said means is a detectable marker.
 - 42. The kit of claim 41, wherein said detectable marker is a radioactive compound.
 - 43. The kit of claim 41, wherein said detectable marker is Gd⁺⁺⁺ or Fe⁺⁺.
 - 44. A hybridoma cell line selected from the group consisting of hybridoma FB501, hybridoma HA386A, hybridoma HA15C7A, and hybridoma HA219B.
 - 45. A fragment of HAAH, wherein said fragment lacks enzymatic activity.
 - 46. A fragment of HAAH, wherein said fragment lacks an alpha-ketoglutarate binding domain and an EGF-like domain.
